SPECIALIZED TOOL

HYDRAULIC
PISTON
4 TON
CAPACITY

☑ The GH-900 US is a camber correction equipment for McPherson-type suspension vehicles.

☑ This equipment has been designed to correct the position of the camber in an efficient and faster way without the need to dismantle the suspension column, change screws and/or heat parts.

☑ This hydraulic system allows exertion up to 6 tons of force on the rotor of suspension column without compromising the shock absorber returning the column and the rotor to its original factory design.

HOW IT WORKS

CAMBER CORRECTION EQUIPMENT FOR MCPHERSON-TYPE SUSPENSION

CAMBER CORRECTION OVERVIEW

The GH-900 US can be used on most vehicles with McPherson suspension. GAHO recommends that the alignment technician observe the structure of the suspension, identify its components, and determine if the components can withstand the pressure to which they will be subjected.

The operator must inform the owner of the vehicle about the risks of the operation, if the case warrants it. GAHO.

GAHO recommends not to exceed a correction greater than 1 degree positive or negative at the position of the suspension column, as specified in the equipment operation manual.

GET CAMBER CORRECTION IN A 5 MINUTES PROCEDURE, WITH NO HEAT NO BENCHS AND NO PROBLEMS

HIGH PROFITABILITY TOOL

EQUIPMENT COMPONENTS

- 01 - Bomba hidráulica
- 02 - Piston de doble acción
- 03 - Base universal 4.2
- 04 - Base universal 6.2

- 05 - Extension
- 06 - Abrazadera
- 07 - Abrazadera fina
- 08 - Regla

- 09 - Apoyo caster
- 10 - Calze Caster
- 11 - Arandelas 1/2" x5
- 12 - Arandelas 9/16" x5

- 13 - Arandelas 3/4" x2
- 14 - Tornillos M12 x 1,25
- 15 - Tornillos M12 x 1,5
- 16 - Tornillos M14 x 1,5
- 17 - Tuerca 1/2 x 20

GH-310

SUSPENSION SPRING COMPRESSOR

BEST VALUE ✓
QUICK AND SAFE OPERATION

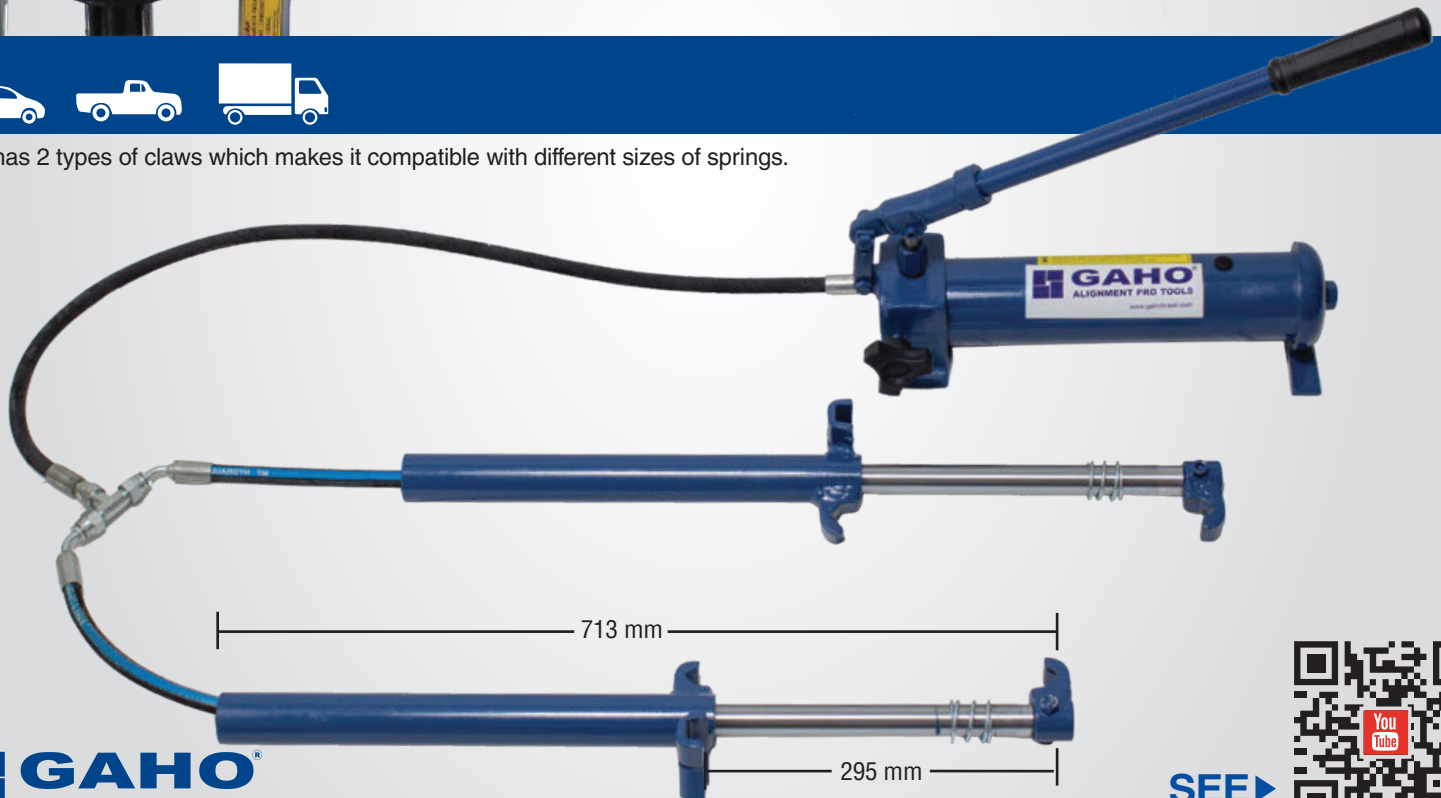

Easily compresses suspension springs from vehicles, vans, suvs and minibuses, the fastest and safe way to change the sturdy helical springs in vehicle suspensions.

This tool allows disassembling and replacing the bellows in the fork without disassembling the axle, saving time and money.

This equipment is manufactured in the modern GAHO Pro Alignment Tools plant in Brazil under strict quality control and is designed to withstand extremely high loads.

* It has 2 types of claws which makes it compatible with different sizes of springs.

GH-720 US

RIM TRUING EQUIPMENT

EASILY STRAIGHTEN STEEL AND ALLOY WHEELS FROM 13" TO 24"

- ✓ Gauge rod to check alignment
- ✓ Special Devices for edge straightening
- ✓ Universal Rim Connect Flange
- ✓ Adjustable arms to fit different wheel sizes
- ✓ **6.5 tons Hydraulic Jack**

Repair seriously damaged wheels in minutes with the correct equipment

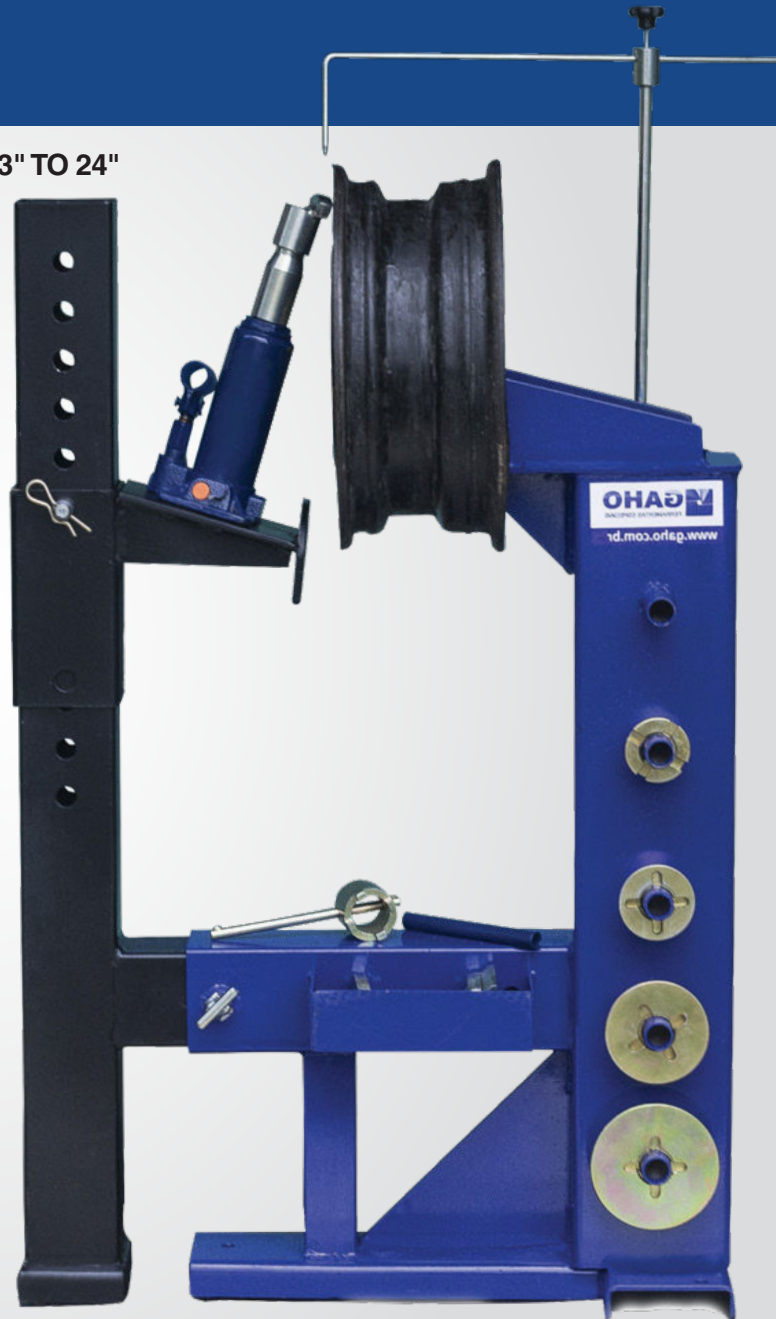

HIGH PROFITABILITY TOOL

Universal rim connect fringe

FOR PROFESIONAL USE ONLY

15 ACCESSORIES INCLUDED
COMPATIBLE WITH ANY WHEEL FROM 13" TO 24"

Manufacturing Center GAHO Santa Catarina, Brazil.

GAHO Alignment Pro Tools is a worldwide provider of vehicle suspension repair tools.

From equipment for the correction of camber and caster, compressors of springs and equipment designed for the repair of wheels.

Our products are recognized for their performance and high quality guarantee. We have a team of experienced engineers and distributors for technical assistance and customer service.

Our distribution model is based on the personalized relationship with our consumers, so we work to provide solutions with reliable products.

In **GAHO** we propose to be world leaders in the design and development of suspension repair tools in the automotive industry.
